

Stroke Rehabilitation A Function Based Approach 2e

Charcot-Marie-Tooth disease

provide enough information for a diagnosis. Individuals showing signs of CMT should be referred to a neurologist or rehabilitation medicine specialist for further

Charcot-Marie-Tooth disease (CMT) is an inherited neurological disorder that affects the peripheral nerves responsible for transmitting signals between the brain, spinal cord, and the rest of the body.

This is the most common inherited neuropathy that causes sensory and motor symptoms of numbness, tingling, weakness and muscle atrophy, pain, and progressive foot deformities over time. In some cases, CMT also affects nerves controlling automatic bodily functions like sweating and balance. Symptoms typically start in the feet and legs before spreading to the hands and arms. While some individuals experience minimal symptoms, others may face significant physical limitations. There is no cure for CMT; however, treatments such as physical therapy, orthopedic devices, surgery, and medications can...

Performance-enhancing substance

Sports and Exercise. 38 (8): 1451-1461. doi:10.1249/01.mss.0000228928.69512.2e. ISSN 0195-9131. PMID 16888459. Prendergast HM, Bannen T, Erickson TB, Honore

Performance-enhancing substances (PESs), also known as performance-enhancing drugs (PEDs), are substances that are used to improve any form of activity performance in humans.

Many substances, such as anabolic steroids, can be used to improve athletic performance and build muscle, which in most cases is considered cheating by organized athletic organizations. This usage is often referred to as doping. Athletic performance-enhancing substances are sometimes referred to as ergogenic aids. Cognitive performance-enhancing drugs, commonly called nootropics, are sometimes used by students to improve academic performance. Performance-enhancing substances are also used by military personnel to enhance combat performance.

Oxygen therapy

Ferranti

Early use of oxygen therapy in the U.S. as an effective approach to rehabilitation for COPD patients. British national formulary : BNF 69 (69 ed - Oxygen therapy, also referred to as supplemental oxygen, is the use of oxygen as medical treatment. Supplemental oxygen can also refer to the use of oxygen enriched air at altitude. Acute indications for therapy include hypoxemia (low blood oxygen levels), carbon monoxide toxicity and cluster headache. It may also be prophylactically given to maintain blood oxygen levels during the induction of anesthesia. Oxygen therapy is often useful in chronic hypoxemia caused by conditions such as severe COPD or cystic fibrosis. Oxygen can be delivered via nasal cannula, face mask, or endotracheal intubation at normal atmospheric pressure, or in a hyperbaric chamber. It can also be given through bypassing the airway, such as in ECMO therapy.

Oxygen is required for normal cellular metabolism. However,...

Substance abuse

CMF 1968-1988, Series 20, No. 2A, 2000 and CMF 1989-1998, Series 20, No. 2E, 2003. Accessed at <http://wonder.cdc.gov/cmfi9.html> 1999-2020 data: Multiple

Substance misuse, also known as drug misuse or, in older vernacular, substance abuse, is the use of a drug in amounts or by methods that are harmful to the individual or others. It is a form of substance-related disorder, differing definitions of drug misuse are used in public health, medical, and criminal justice contexts. In some cases, criminal or anti-social behavior occurs when some persons are under the influence of a drug, and may result in long-term personality changes in individuals. In addition to possible physical, social, and psychological harm, the use of some drugs may also lead to criminal penalties, although these vary widely depending on the local jurisdiction.

Drugs most often associated with this term include alcohol, amphetamines, barbiturates, benzodiazepines, cannabis...

Essential tremor

1212/01.WNL.0000154596.21335.2E. Zesiewicz TA, Ward CL, Hauser RA, Sanchez-Ramos J, Staffetti JF, Sullivan KL (2007). "A double-blind placebo-controlled

Essential tremor (ET), also called benign tremor, familial tremor, and idiopathic tremor, is a medical condition characterized by involuntary rhythmic contractions and relaxations (oscillations or twitching movements) of certain muscle groups in one or more body parts of unknown cause. It is typically symmetrical, and affects the arms, hands, or fingers; but sometimes involves the head, vocal cords, or other body parts. Essential tremor is either an action (intention) tremor—it intensifies when one tries to use the affected muscles during voluntary movements such as eating and writing—or it is a postural tremor, which occurs when holding arms outstretched and against gravity. This means that it is distinct from a resting tremor, such as that caused by Parkinson's disease, which is not correlated...

Mufaddal Saifuddin

September 2015. "Leader spirituel Bohras : Elevé au rang de Grand Croix de 2e Classe - Midi Madagasikara" [Spiritual leader Bohras: Raised to the rank of

Syedna Mufaddal Saifuddin (Arabic: مُفَدَّلُ السَّيْفِ الْقَادِرُ, romanized: ‘Ālī Qadr Mufaḍḍal Sayf al-Dīn) is the spiritual leader, the 53rd Da'i al-Mutlaq of more than one million Dawoodi Bohras, a subgroup of the Tayyibi, Musta'li, Ismaili Shia branch of Islam. He is the second son of the 52nd Da'i al-Mutlaq, Mohammed Burhanuddin, whom he succeeded in 2014. He is the Chancellor of Aligarh Muslim University and Jamia Millia Islamia situated in India.

In Egypt, he rebuilt shrines of the Ahl al-Bayt and is personally responsible for the restoration of medieval Fatimid architecture, notably Al-Anwar Mosque, Al-Aqmar Mosque, Al-Juyushi Mosque, and Lulua Mosque. In Yemen, he has spearheaded several campaigns to improve socio-economic conditions of the inhabitants of the Haraaz region, introducing...

Ozone

$\{O3_{(g)}\} + 2H^{+} + 2e^{-} \rightleftharpoons O2_{(g)} + H2O\} \quad (E^{\circ} = \text{2.075 V})$ This can be observed as an unwanted reaction in a Hoffman apparatus during

Ozone (), also called trioxxygen, is an inorganic molecule with the chemical formula O3. It is a pale-blue gas with a distinctively pungent odor. It is an allotrope of oxygen that is much less stable than the diatomic allotrope O2, breaking down in the lower atmosphere to O2 (dioxygen). Ozone is formed from dioxygen by the action of ultraviolet (UV) light and electrical discharges within the Earth's atmosphere. It is present in very low concentrations throughout the atmosphere, with its highest concentration high in the ozone layer of the stratosphere, which absorbs most of the Sun's ultraviolet (UV) radiation.

Ozone's odor is reminiscent of chlorine, and detectable by many people at concentrations of as little as 0.1 ppm in air. Ozone's O3 structure was determined in 1865. The molecule was...

American Motors Corporation

buyout" . Eugene Register-Guard. Oregon. Associated Press. August 6, 1987. p. 2E. Archived from the original on August 28, 2021. Retrieved September 21, 2020

American Motors Corporation (AMC; commonly referred to as American Motors) was an American automobile manufacturing company formed by the merger of Nash-Kelvinator Corporation and Hudson Motor Car Company on May 1, 1954. At the time, it was the largest corporate merger in U.S. history.

American Motors' most similar competitors were those automakers that held similar annual sales levels, such as Studebaker, Packard, Kaiser Motors, and Willys-Overland. Their largest competitors were the Big Three—Ford, General Motors, and Chrysler.

American Motors' production line included small cars—the Rambler American, which began as the Nash Rambler in 1950, Hornet, Gremlin, and Pacer; intermediate and full-sized cars, including the Ambassador, Rambler Classic, Rebel, and Matador; muscle cars, including the...
